Noida, U.P., India | +91-8559813490 | jinesh3715@gmail.com | linkedin.com/in/jinesh-dutt-joshi-016b50177

Full Stack Developer | Java Spring Boot • ReactJS • SQL

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience delivering enterprise Java applications and large-scale government and healthcare portals for MeitY and DAHD. Core expertise in Java Spring Boot, Spring MVC, ReactJS, Redux, and PostgreSQL, with additional experience in Redis-based caching, identity verification workflows, and system design (HLD/LLD). Proficient in .NET, Node.js, Python, DevOps tooling (Docker, Jenkins, AWS, Azure), and modern frontend frameworks. Skilled in REST API design, application architecture, security testing, and end-to-end project delivery across 4 live government and enterprise systems.

EXPERIENCE

Project Engineer — CDAC Noida, Sector-62, India

Nov 2022 – Present

Government & Enterprise Portals — MeitY (e-MSIPS, DLI), DAHD (NANDI), Healthcare (HIMS)

- Engineered full-stack solutions across 4 live portals (e-MSIPS, DLI, NANDI, HIMS) using Java Spring Boot, Spring MVC, ReactJS, Redux, JSP, HTML5, CSS3, JavaScript (ES6+), Bootstrap.
- Optimized PostgreSQL databases with DBLINK multi-DB integration, reducing cross-database query time by ~40%.
- Designed and deployed 10+ RESTful APIs across independent government and enterprise systems, improving interoperability.
- Contributed to High-Level Design (HLD) and Low-Level Design (LLD) for application components, API integrations, and system architecture across multiple portals, and implemented Redis-based caching to improve application responsiveness.
- Delivered 15+ custom modules, dynamic form builders, and workflows for MeitY & DAHD portals — streamlining application processing for 1,000+ end users.
- Built disbursement claims management system processing 4 quarterly claim cycles per year, reducing manual reconciliation effort by ~30% for 500+ ministry clients and end users.

KEY PROJECTS

HIMS — Hospital Information Management System

Java • Spring Boot • ReactJS • Redux • Redis • Elasticsearch • RESTful APIs • Aadhaar/OVSE Verification

- Developed an enterprise healthcare portal to digitize hospital workflows and patient services, contributing to HLD/LLD, application architecture, and REST API development.
- Implemented Aadhaar/OVSE-based identity verification and OTP-based mobile verification to support secure patient and user authentication workflows.
- Built external API integrations for data exchange with third-party services, applied Redis-based caching, and built Elasticsearch-powered JS dashboards for real-time hospital data.

e-MSIPS Application System — MeitY

Java Spring MVC • ReactJS • JSP • PostgreSQL • DBLINK • Kafka • Elasticsearch • JasperReports

- Built end-to-end platform for online submission, scrutiny, and incentive management of MSIPS and EMC scheme applications for the Ministry of Electronics & Information Technology — handling 500+ applications.
- Integrated DBLINK multi-database access; deployed API integrations with 2 external government systems; built custom modules and online forms reducing manual processing time by ~35%.
- Implemented Single Sign-On (SSO) login, and used Kafka for asynchronous processing/notifications with Elasticsearch-powered JS dashboards for real-time application data.

NANDI Portal — NOC Approvals for New Drugs & Inoculation System — DAHD

Java Spring Boot • JSP • PostgreSQL • Kafka • RESTful APIs • Burp Suite • PuTTY / WinSCP

- Developed online platform to streamline veterinary product approval processes for the Dept. of Animal Husbandry and Dairying, using Kafka for asynchronous processing and notification delivery.

DLI Application System — Design Linked Incentive — MeitY

Java Spring MVC • JSP • PostgreSQL • Kafka • Elasticsearch • JasperReports • Payment Gateway • Bank Verification API

- Built submission and processing system for semiconductor design project applications; compliance review against EDA tool standards; used Kafka for event streaming between modules and Elasticsearch for real-time JS dashboards.

Chatbot — Intelligent User Support

JavaScript • Spring Boot • REST APIs

- Designed and built a chatbot for intelligent Q&A handling on government portals — reduced manual support queries by ~50% and improved client response time significantly.

Banking & Payment Integration — HIMS & DLI

UPI • Payment Gateway • Bank Verification API • WhatsApp OTP

- Integrated a UPI-based payment gateway and a bank account verification API into the HIMS and DLI portals, enabling secure online payment processing and beneficiary bank validation.
- Implemented WhatsApp-based OTP verification as an additional authentication and notification channel across HIMS and DLI.

TECHNICAL SKILLS

Core Stack: Java 8 / 17 / 21, Spring Boot, Spring MVC, Spring Security, ReactJS, Redux, JSP, RESTful APIs

Frontend: HTML5, CSS3, JavaScript (ES6+), jQuery, AJAX, Bootstrap, Tailwind CSS, NextJS, VueJS

Databases, Caching & Search: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Apache Kafka

DevOps & Cloud: Docker, Jenkins, Rancher, Harbor, AWS (EC2, S3), Azure, GitLab, Maven, PuTTY, WinSCP

Other Tech: .NET / C#, Node.js, Python, FastAPI, C, C++

Identity, Security & Payments: Aadhaar/OVSE Verification, Mobile & WhatsApp OTP, SSO, Payment Gateway (UPI), Bank Verification API, Burp Suite

Tools & Methodologies: Postman, JUnit, BugZilla, JasperReports, HLD/LLD, Application & Software Design, Agile, Scrum, Requirement Analysis, DSA

EDUCATION

Post Graduate Diploma in Advanced Computing (PGDAC)

IACSD, Pune, Maharashtra, India — 2022

Bachelor of Technology — Computer Science & Engineering

Rajasthan Technical University, Kota, Rajasthan, India — 2018
